

# Overview of the stoneworts (Charales) of Serbia with the estimation of the threat status

Jelena BLAŽENČIĆ

Institute of Botany and Botanical Garden "Jevremovac", Faculty of Biology, University of Belgrade, Takovska 43, 11000 Belgrade, Serbia

**ABSTRACT:** The study provides insights into stoneworts of Serbia (1851-2013). For each taxon, the synonym(s), distribution, threat factors and the IUCN threat category is given. In Serbia, 23 species are present of ca. 400 known worldwide.

**KEY WORDS:** stonewort, Charales, Serbia, distribution, threat status

## INTRODUCTION

The study of stonewort flora and vegetation, their distribution and ecological characteristics are needed at both the regional and global levels. Thus, this review presents the first complete up-to-date overview on stoneworts of Serbia. The overview includes data both from the literature and unpublished author records.

The first data on stoneworts in Serbia were dated from the herbarium of Josif Pančić. In the period from 1851 to 1880, he collected stoneworts from 17 localities in Serbia. Data on the Pančić collection were considered jointly with his own data from Southern Serbia and published by Nedeljko Košanin (KOŠANIN 1907a, 1907b).

After that, until the 1970s, information on stoneworts in Serbia could be found in several publications on aquatic flora and vegetation (SIMIĆ 1905/06; KATIĆ 1899/1900; JANKOVIĆ 1953; SLAVNIĆ 1956; ČANAK 1964; MARINOVIC 1955; MARINOVIC & KRASNIĆ 1970; VUKOJE 1979; CVIJAN 1985; GUELMINO 1973; BUTORAC et al. 1994).

Since the 1970s, continuous and detailed investigation of stoneworts has taken place in the western and central Balkans (BLAŽENČIĆ 1980, 1984, 1995; BLAŽENČIĆ &

RADOTIĆ 1982; BLAŽENČIĆ et al. 1990, 1995a, b, 2006a, b; BLAŽENČIĆ & BLAŽENČIĆ 1991, 1997; RANDJELOVIĆ & BLAŽENČIĆ 1996; BLAŽENČIĆ & STANKOVIĆ 2008; VESIĆ et al. 2011).

The catalogue, as a forerunner of the Flora of Stoneworts of Serbia, gives a latin name for each taxon present in Serbia, followed by synonymy, taxonomic status, characteristics, habitat type, distribution in Serbia, threat factors, number of localities and threat status. Collection numbers are given for each taxa present in the BEOU Charophyta collection (VUKOJIĆ et al. 2011).

The threat status of each species is estimated according to STEVANOVIĆ (1999) and the IUCN (2001). The standard IUCN critera have been used for threat estimation (STEWART 2004; BLINDOW 2000; BLAŽENČIĆ et al. 2006a,b) where possible, or slightly modified and adjusted to water macrophyte algae, taking into account ecological parameters of the habitat (SCHMIDT et al. 2006).

Classification and nomenclature of the stoneworts follow KRAUSE (1997). In Serbia, so far, 23 species of stoneworts are known, belonging to four genera: *Nitella* (7 species, 1 form), *Tolypella* (3 species), *Nitellopsis* (one species) and *Chara* (12 species, 25 forms and 3 varieties).

## Conspectus of stoneworts of Serbia

### *Nitella* Agardh 1824

1. *Nitella brachytele* A.Br.
2. *Nitella capillaris* (Krocker) J. Groves et Bullock-Webster 1920
  - f. *longifolia* A.Br.
3. *Nitella confervacea* (Bréb.) A. Braun ex Leonh. 1863
4. *Nitella gracilis* (Sm.) C. Agardh 1824
5. *Nitella mucronata* (A. Braun) Miq. in H. C. Hall 1840 emend. Wallman 1853
6. *Nitella opaca* (Bruzelius) C. Agardh 1824
7. *Nitella syncarpa* (Truill.) Chevall. 1827

### *Tolypella* (A. Braun) A. Braun 1850

1. *Tolypella prolifera* (Ziz ex A. Braun) Leonhardi 1863
2. *Tolypella intricata* (Trentepohl ex Roth) Leonhardi 1863
3. *Tolypella glomerata* (Desv.) Leonh.

### *Nitellopsis* Hy 1889

1. *Nitellopsis obtusa* (Desv. In Loisel.) J. Groves 1919

### *Chara* Vaillant 1919

1. *Chara braunii* C. C. Gmel. 1826
  - f. *máxima* Mig.
  - f. *tenuior* A. Br.
2. *Chara canescens* Desv. & Loisel. in Loisel. 1810
3. *Chara connivens* Salzm. ex A. Braun 1835
4. *Chara contraria* A. Braun ex Kütz. 1845 s.str.
  - f. *capillacea* Mig.
  - f. *stagnalis* F.
  - f. *aspera* F.
  - var. *nitelloides* A. Br.
5. *Chara globularis* Thuill. 1799
  - f. *humilior* Mig.
  - f. *lacustris* Mig.
  - f. *laxa* Mig.
  - f. *stricta* Mig.
  - f. *normalis* Mig.
6. *Chara hispida* (L.) Hartm. 1820
7. *Chara intermedia* A. Braun in A. Braun, Rabenh. & Stizenb. 1859
  - f. *decipiens* A. Br.
  - f. *brachiphylla* Mig.
8. *Chara tenuispina* A. Braun 1835
  - f. *nitida* Mig.
9. *Chara rohlenae* Vilh.
10. *Chara tomentosa* L. 1753
11. *Chara virgata* Kütz. 1834
12. *Chara vulgaris* L. 1753
  - f. *nidifica* Mig.

### *f. pseudocontraria* Mig.

### *f. normalis* Mig.

### *f. vulgaris* Mig.

### *f. pulchella* Mig.

### *f. cuspidata* Mig.

### *f. aequistriata* A.Br.

### *f. gymnophylla* (A. Br.) Hy

### *f. subnudifolia* Mig.

### *f. paludosa* F.

### *f. subsegregata* Nordst.

### *f. tenuissima* Mig

### *var. longibractea* (Kutz) J. Grov. Bull.-Web.

### *var. nitelloides* A. Br.

## Additional data on stonewort taxa in Serbia

### *Nitella brachytele* A. Braun 1864

Syn.: *Nitella mucronata* var. *crassa* et *brachiteles* A. Braun in herbar

*Nitella furcata* subsp. *mucronata* var. *sieberi* f. *brachytele* (A. Br. in Leonh.) R. D. W. 1965

Habitat: Channels; Limnophyte, it inhabits shallow slowly moving oligo-mesotrophic waters, on muddy to clayey substrate.

Distribution in Serbia: Channel by Srebrno lake near Veliko Gradište (leg. Jelena & Živojin. Blaženčić, 30.09.1983); Channel by Padinska Skela (leg. Zoran Romčević, 10.09.1998)

Threat factors: Agricultural chemistry, overgrowing by vascular plants, mechanical cleaning of the channels.

IUCN Threat status in Serbia: EW (?) – only two records, not seen at the localities again after record was made

### *Nitella capillaris* (Krocker) J. Groves et Bullock-Webster 1920

Syn.: *Chara capillaris* Krocker, 1814; *Nitella capitata* Ag., 1824; *Nitella syncarpa* var. *capitata* (Nees) Kütz., 1845; *Nitella capillaris* f. *capillaris* Wood, 1962; *Nitella syncarpa* var. *Capitata* (Nees) Kütz. in R. D. W. 1965

Habitat: Channels, ponds; In shallow water (to 0.7 m) in channels, ponds within the meadows or water depression in riparian forests. Water of neutral to slightly alkaline pH (7.0 -7,8). It can often be found with other stoneworts and vascular plants (BLAŽENČIĆ *et al.* 1995a, b; VESIĆ *et al.* 2011).

Distribution in Serbia: In the Markova sedmica small lake by Graničar near Subotica

(BLAŽENČIĆ *et al.* 1995a, b); Special Nature Reserve "Zasavica" (VESIĆ *et al.* 2011); in the lake by Pirot (KOŠANIN 1907a, b; MILOVANOVIĆ 1949)

*f. longifolia* A. Br. (as *Nitella capitata* (Nab Es) Ag.) (KOŠANIN 1907a, b; MILOVANOVIĆ 1949).

Threat factors: drainage, field drying, mechanical cleaning of the channels, eutrophication, overgrowing  
IUCN Threat status in Serbia: DD (CR).

### ***Nitella confervacea* (Breb.) A. Br. 1863**

Syn.: *Nitella batrachosperma* (Reich.) A. Br. 1847; *Nitella gracilis* var. *confervacea* Bréb., 1849; *Nitella nordstedtiana* J. Grov. 1890; *Nitella confervacea* ssp. *brébissonii* (A. Br. ex Bréb.) Hy, 1905; *Nitella gracilis* ssp. *gracilis* var. *confervacea* f. *confervacea* R. D. W. 1965

Habitat: ponds; inundating zone in riparian forests, shallow.

Distribution in Serbia: Special Nature Reserve "Zasavica" (VESIĆ *et al.* 2011);

Threat factors: extensive tourism, boating, mechanical cleaning of the water habitats

IUCN Threat status in Serbia: CR (D), one location with less than 50 individuals.

### ***Nitella gracilis* Agardh 1824**

Syn.: *Chara gracilis* Smith, 1810; *Nitella gracilis* (Smith) Ag. 1824 etauct. plur.; *Nitella gracilis* ssp. var. etf. *Gracilis* Wood, 1962

Habitat: accumulations on peatlands and streams after thermo-mineral sources; mesotrophic waters (to 6m), on muddy and sandy substrate covered by detritus. Water reaction (pH=7.0-7.4) (BLAŽENČIĆ 1984; BLAŽENČIĆ & BLAŽENČIĆ 1991; RANDJELOVIĆ & BLAŽENČIĆ 1996; STEVANOVIĆ *et al.* 2003).

Distribution in Serbia: Rgoška banja, Vlasinsko jezero, Vrujci, Danube by Banatska Palanka.

Threat factors: extensive tourism, mechanical cleaning of the water habitats, eutrophication

IUCN Threat status in Serbia: CR (B1,B3c).

### ***Nitella mucronata* (A. Br.) Miquelin H. C. Hall 1840 emend. Wallman 1853**

Syn.: *Chara furcata* Barbieri, 1827; *Chara flexilis* Bischoff non L. 1828; *Chara mucronata* Braun, 1834; *Nitella flabellata* Kütz. 1843; *Nitella mucronata* f. *mucronata* R. D. W. 1962; *Nitella furcata* ssp. var. et f. *mucronata* R. D. W. 1962

Habitat: lakes, channels, fishponds; Limnophyte, in coastal region (0.2-1.0 m), on muddy substrate, water (pH=6.4 - 8.2).

Distribution in Serbia: Blace (near Prokuplje, leg. J. & Ž. Blaženčić, 20.08.1986); Čenta, Vojvodina (leg. Z. Romčević, 27.08.1998), Savsko lake near Belgrade (Ada Ciganlija) (BLAŽENČIĆ 1995), Special Nature Reserve "Zasavica" (loc.: Ostrovac, Gradina, Lug, Sadžak Valjevac, Preseka, Šumareva čuprija, Pačija bara, Bostanište Trebljevine and Panjevine) (VESIĆ *et al.* 2011)

Threat factors: eutrophication, anthropogenic activities, low competence ability with other hygrophytes, drying, tourism.

IUCN Threat status in Serbia: CR (A1e, C2a).

### ***Nitella opaca* Agardh 1824**

Syn.: *Chara opaca* Bruz., 1824; *Nitella syncarpa* var. *opaca* (Bruz) Kützing, 1845; *Nitella syncarpa* var. *glomerata* A. Braun 1847; *Nitella flexilis* var. *flexilis* f. *flexilis* R. D. W., 1962

Habitat: lakes, drained channels; limnophyte, to 1.0 – 6.0 m. It prefers cold water currents, near sublacustric sources, water (pH = 5.6 - 6.4). From plain to montane areas.

Distribution in Serbia: Tresetište by Subotica (BLAŽENČIĆ *et al.* 1995a,b); Vlasinsko jezero (BLAŽENČIĆ & BLAŽENČIĆ 1991; RANDJELOVIĆ & BLAŽENČIĆ 1996)

Threat factors: eutrophication, low competitiveness with other hygrophytes

IUCN Threat status in Serbia: CR (A1e).

### ***Nitella syncarpa* (Thuill.) Chevallier 1827**

Syn.: *Chara syncarpa* Thuill. 1799; *Tolypella coutinhoi* Gonçalves da Cunha, 1935; *Nitella capillaris* f. *syncarpa* (Thuill.) Wood 1962; *Nitella syncarpa* var. *syncarpa* (Thuill.) Chev. em. R. D. W. 1962

Habitat: lakes, streams, brackish ponds; limnophyte, shallow clear mesotrophic to eutrophic, neutral to slightly alkaline waters (0.5 – 3.0 m), on detritus, slime or muddy sands Characteristic species in ass. *Utriculari-Nitelletum syncarpe* V. Randl. & J. Blaž. 1995

(RANDJELOVIĆ & BLAŽENČIĆ 1996)

Distribution in Serbia: Vlasinsko blato (KOŠANIN 1907a, b; MILOVANOVIĆ 1949), Vlasinsko lake (RANDJELOVIĆ & BLAŽENČIĆ 1996), Danube, left side in pond across the Lido by Zemun, Bajina šljunkara (between Danube and Crvenka, leg. Snežana Perišić and Z. Romčević, 19.06.1999), Special Nature Reserve "Zasavica" (VESIĆ *et al.* 2011)

Threat factors: pollution, drying, low competence, agrochemistry.

IUCN Threat status in Serbia: CR (C2a).

### ***Tolypella glomerata* (Desv.) Leonh. 1863**

Syn.: *Chara glomerata* Desv. In Lois., 1810; *Nitella glomerata* Chev., 1830; *Tolypella glomerata* Leonh., 1863; *Tolypella nidifica* var. *glomerata* (Desv. In Lois) R. D. W. 1962

Habitat: ponds; in shallow (0.5m), ephemeric waters, on sandy substrate, water (pH = 7.5)

Distribution in Serbia: ponds by r. Danube near Borča (Belgrade) (leg. Z. Romčević, 11.06.1999), Subotička peščara, in Majdan pond (N: 46° 09'32.6"; E: 19° 36'21.4", 108 m, leg. J. Blaženčić 9.05.2011)

Threat factors: drying, overgrowing  
IUCN Threat status in Serbia: CR (C2a).

**Tolypella intricata (Trentep. ex Roth.) Leonh. 1863**

Syn.: *Chara intricata* Trent. ex Roth. 1797; *Nitella intricata* /Trent. ex Roth.) Ag. 1824;

*Tolypella intricata* var. *intricata* f. *intricata* R. D. W. 1962

Habitat: ephemeric ponds in swamp forests, channels, waterholes, early spring species; In shallow (to 0.5 m) water (pH = 7.8), on bogland mold (BLAŽENČIĆ & STANKOVIĆ 2008; VESIĆ *et al.* 2011)

Distribution in Serbia: Special Nature Reserve "Zasavica" (VESIĆ *et al.* 2011: 886)

Threat factors: drying, overgrowing, eutrophication

IUCN Threat status in Serbia: CR (A1a, B2a, C2a).

**Tolypella prolifera (Ziz. Ex Braun) Leonh., 1863**

Syn.: *Chara prolifera* Barun 1834; *Nitella prolifera* (Ziz ex A. Br.) Kütz 1845; *Tolypella prolifera* Leonh. 1863; *Tolypella intricata* var. *intricata* f. *prolifera* (Ziz. ex A. Br.) R. D. W. 1962

Habitat: ponds by rivers and in inundated forest; ephemeric shallow ponds (to 0.2 m) on slim-sandy substrate.

Distribution in Serbia: Senta, Mrtva Tisa (GUELMINO 1973), ponds near r. Danube by Zemun, Belgrade (leg. Z. Romčević. 15.06.1999); Special Nature Reserve "Zasavica" (VESIĆ *et al.* 2011: 886)

Threat factors: drying, overgrowing

IUCN Threat status in Serbia: CR (A1a, B2a, C2a).

**Nitellopsis obtusa (Desv. in Lois.) J. Grov. 1919**

Syn.: *Chara obtuse* Desv. 1810; *Chara stelligera* Bauer in Reich. 1829; *Nitella stelligera* (Bauer in Reich.) Hy 1890; *Nitellopsis stelligera* (Bauer in Reich.) Hy 1890; *Tolypellopsis stelligera* (Bauer in Reich.) Migula 1890; *Tolypellopsis ulvoides* Wille 1891; *Tolypellopsis obtusa* (Desv.) Beg. & Form. 1907

Habitat: Inundation areas by rivers, river bays, permanent and ephemeric ponds; Limnophyte of oligo to mesotrophic waters (to 1.5 m). On slime substrate in neutral to slightly alkaline waters (pH = 7.0 - 7.7). Dominant species in community *Nitellopsidetum obtusae* (Sauer 1937) Dambska 1961 (STEVANović *et al.* 2003)

Distribution in Serbia: Ada Čibuklija by Ram (STEVANović *et al.* 2003), Dolnice by Banatska Palanka (STEVANović *et al.* 2003), Bela Crkva, pond by Nera (leg. Aleksandra Vesić. 15.09.2012)

Threat factors: eutrophication, low competence ability, drying

IUCN Threat status in Serbia: CR (A1e, A2e).

**Chara braunii Gmelin 1826**

Syn.: *Chara coronata* Ziz. Ex Bischoff 1828; *Charopsis barunii* (Gmel.) Kütz. 1843; *Nitella braunii* (Gmel.) Rabenh. 1847; *Chara braunii* f. *braunii* Gmel.em. R. D. W. 1962

Habitat: ponds, river sides, fishponds, lakes, swamps, pools with radioactive water (radon); limnophyte, in permanent to ephemeric, mesotrophic to eutrophic waters (0.3 to 1.0 (6.0) m), water (pH = 5.6 - 8.0), on muddy substrate (BLAŽENČIĆ & BLAŽENČIĆ 1991; BLAŽENČIĆ *et al.* 1995a, b). In ass. *Nitelletum opacae* Corillion 1957 (RANDJELOVIĆ & BLAŽENČIĆ 1996), and ass. *Najadeto-Chareatum braunii* V. Randj. et J. Blaž. 1995 (RANDJELOVIĆ & BLAŽENČIĆ 1996)

Distribution in Serbia: Kupinovo (sensu *C. coronata* Ziz. - FILARSZKY 1931), By Skela near Sava (sensu *C. coronata* Ziz. - FILARSZKY 1931), Ečka (fishponds), Vlasinsko lake (BLAŽENČIĆ & BLAŽENČIĆ 1990; RANDJELOVIĆ & BLAŽENČIĆ 1996), Zemun (Belgrade) in ponds and pools on the left Danube riverside across the Lido (leg. Z. Romčević 19.06.1999), Belgrade, ponds by Danube riverside near Pančevački bridge (leg. Z. Romčević 22.07.1999), Petrovaradinski rit (leg. Imre Krizmanić 05.07.1999), Štrbac (Gornje Podunavlje, leg. Dušanka Laketić 07.07.2010)

f. *máxima* Mig.: Jakovo in Srem by r. Sava (as *C. coronata* Ziz., FILARSZKY 1931)

f. *tenuior* A. Br.: Kupinovo in Srem (as *C. coronata* Ziz., FILARSZKY 1931)

Threat factors: drying, fish over-population, water level variation, agrochemistry

IUCN Threat status in Serbia: VU (A1e, A2e, B1, B3a)

**Chara canescens Desv. Et Lois. 1810**

Syn.: *Chara horridula* Deth 1811; *Chara crinita* Wallr. 1815; *Chara pusilla* Kütz. 1857; *Chara canescens* f. *canescens* Desv. In Lois. em R. D. W. 1962

Habitat: ponds, salt marshes; brakish shallow water (to 0.5 m) on muddy substrate.

Distribution in Serbia: In surroundings of Prokuplje (Suva česma and Bresnička salt marsh). (leg. Vladimir Randjelović & Bojan Zlatković 21.07.2005)

Threat factors: drying and overgrowing

IUCN Threat status in Serbia: EW (?)

**Chara connivens Salzm. Ex A. Br. 1835**

Syn.: *Chara globularis* f. *connivens* (Slazm. ex A. Br.) R. D. W. 1962

Habitat: drained channels; in shallow water (to 1.0 m), on slimy substrate

Distribution in Serbia: Srebrno lake by Veliko gradište (leg. J. & Ž. Blaženčić 30.09.1980 and 17.07.1984).

Threat factors: agrochemistry, overgrowing  
IUCN Threat status in Serbia: CR (A1ae)

### ***Chara contraria* A. Braun ex Kützing 1845**

Syn.: *Chara foetida* var. *moniliformis* A. Br. 1834; *Chara foetida* var. *contraria* (A. Br. ex Kütz.) Coss. et Germ. 1882; *Chara vulgaris* var. *vulgaris* f. *contraria* A. Br. ex Kütz. em R. D. W. 1962.

Habitat: rivers, ponds in meadow depressions by rivers, around springs, riversides, lakes peat bogs, drained channels, sources, fishponds and brakish waters, cattle watering places; limnophyte of permanent and ephemeral oligotrophic to mesotrophic waters (0.5-2.0 m), on muddy to sandy substrates in neutral to slightly alkaline waters (pH = (6.4) 7.4 - 7.8)

Distribution in Serbia: lake by Čenta (BLAŽENČIĆ *et al.* 1995a,b), Kišnica by Badovac - 15 km from Prištine. (leg. Z. Krivošeј 26.05.1993), Gračaničko lake, down from the water factory system (leg. Z. Krivošeј 26.05.1993), Savsko lake in Belgare (BLAŽENČIĆ 1995 (1997)), Ošljak (Šara Mt): in ponds down from the springs at Ošljak (leg. Pedja Janačković, 15.07.1995), peatland Mala Batura in Tara Mt near Crni vrh, in meadow depressions with clear water up to 0.5 m. (leg. Ljubinka Obušković, 06.1994), Malo Savsko lake ("Safari") in Ada Ciganlija (Belgrade) (leg. J. Blaženčić 5.11.1996), Subotica at loc. "Tresetište" (BLAŽENČIĆ *et al.* 1995a,b), Ribariće, ponds near Ibar river (leg. Nusret Prelević, 20.10.1998), Zemun, in ponds by r. Danube across Zemun (Lido). (leg. Z. Romčević, 19.06.1999), Belgrade in ponds near Danube at Pančevački bridge (leg. Z. Romčević, 22.07.1999), Pešter, lake by the village Kara Jukića bunar (leg. P. Lazarević, 06.2001), in Jadovnik Mt, peak Katunić, 1600 m, in pond, 0.2 - 0.5 m, (leg. P. Lazarević ?), Drenovac near Kragujevac in Jelina bara pond, (leg. J. Blaženčić, 10.05.1976), village Paležnica, rivulet Marila, (leg. 17.09.2002), Niš – salt spring Oblačina (leg. V. Randjelović & B. Zlatković, 08.09.2005), Lepajsko vrelo spring, Očni izvor (leg. V. Randjelović & B. Zlatković, 21.07.2005), Vranjak at Tara Mt, in the gorge between Veliko Zaovinsko lake and Spajića lake, in the stream coming out from a tunnel (leg. V. Stevanović, 05.08.2003), Special Nature Reserve "Zasavica" by Sremska Mitrovica (VESIĆ, *et al.* 2011), Ribar banja - Franjina skela, (leg. D. Lakerić 12.07.2010), Subotička peščara, Majdan bara – road to Kelebija (N 46° 09' 32.6"; E 19° 36' 21.4", 108 m, leg. J. Blaženčić 09.05.2011), village Bube in Rogozna Mt (Ibarski Kolašin), near road, 932 m nv. (Leg ? date ?), Channel by Srebrno lake (Veliko Gradište) (leg. J. Blaženčić, 30.09.1983)

**f. *capillacea* Mig.** Valjevo in the river Gradac. (Leg. D. Lakušić, 25.05.1993), Zvonce spa in river Vaternica, fishpond 100 x 25 m (leg. Gordana Subakov-Simić, 06.08.2004).

**f. *stagnalis* F.** In stagnant water of the river Beli Rzav (FILARSZKY 1931)

**f. *aspera* F.** In r. Sava by Skela and Kupinovo as *Chara pseudogymnophylla* F. syn. *Chara contraria* var. *gymnophylla* A. Br. (FILARSZKY 1931)

**var. *nitelloides* A. Br.** microaccumulation in river Pčinja by the monastery Sv. Prohor Pčinjski (leg. J. Blaženčić, 4.06.1995), Niš - Lalinačka slatina. (leg. V. Randjelović & B. Zlatković, 08.09.2005, 02.06.2013), Niš - Slani spring, (leg. V. Randjelović & B. Zlatković, 08.09.2005), Donje Vlase in Seličevica Mt, well at 1 m. (leg. B. Zlatković, 04.06.1991), Vranje, Aleksandrovačko lake, ponds at saltlands (leg. Snežana Simić, 11.06.2011), Mokra Gora, Prokletije, ponds at Ponor down from Klinski peak (1600 m) with *C. rohlenae*. (leg. P. Lazarević, 28.09.2010).

Threat factors: Eutrophication, low competence ability, habitat drying, tourism, agrochemistry

IUCN Threat status in Serbia: LR (nt)

### ***Chara globularia* Thuillier 1799**

Syn.: *Chara capillacea* Thuill. 1799; *Chara fragilis* Desvaux in Loiseleur-Deslongchamps 1810; *Chara hedwigii* Ag., in Bruzelius 1824; *Chara globularis* f. *globularis* R. D. W. 1962;

*Chara globularis* var. *globularis* f. *Globularis*. D. W. 1965; *Chara fragilis* Desv. in Lois. 1810; *Chara pulchella* Wallr. 1815; *Chara globularis* var. *globularis* f. *globularis* Thuill. em. R. D. W. 1962.

Habitat: rivers, ponds by the rivers, channels, lakes, peatlands, sources, springs, fishponds; limnophyte, fresh to mineral and brakish neutral to slightly alkaline waters (pH = 7.0 - 7.8), at detritus and slimey-sandy substrates (0.1 - 3.0 m).

Distribution in Serbia: Belgrade (Karaburma), in r. Danube (sensu *C. fragilis* Desv., KOŠANIN 1907a, b; MILOVANOVIĆ 1949), Belgrade surrounding – Viliman, Ostružnička river (MARINOVIC 1955), Poklek spa (Kosovo, sensu *Ch. fragilis* MARINOVIC & KRASNIĆI, 1970), Channel by Srebrno lake (Veliko Gradište, leg. J. & Ž. Blaženčić, 30.09.1983; 09.06.1983; 17.07.1984; 20.07.1985 and 14.05.2002), Banatska Palanka (old Karaš river bed, leg. V. Stevanović, 6.05.2000), Muhađer Babuš (by Priština, leg. J. & Ž. Blaženčić, 29.06.1985), Vrujci spa (leg. Pavle Andjus 3.10.1991), Belgrade, Savsko lake at Ada Ciganlija (BLAŽENČIĆ 1995 (1997)), pond in Deliblatska sands (leg. D. Lakušić, 1998), Belgrade in ponds by r. Danube at Pančevački bridge (leg. Z. Romčević, 22.07.1999), Uvac in small lake down from dam (leg. Jelena Krizmanić, 20.08.1999), Vrujci spa in rivulet Toplica and in the thermal stream (leg. M. Živić, 30.01.2001 and 20.04.2002), Apatin, Kopačko jezero (leg. Darinka Milovanović,

30.05.1948 and 08.08.1948), Sredorek by Kragujevac, ponds between Rasina and Morava (leg. ? 07.08.1979), Banatska Palanka, ponds by r. Danube in willow forest (leg. V. Stevanović, 06.05.2000), Uvac, Štrpcce, upstream from a bridge. (leg. M. Veljić, 05.05.2000), South Morava, by Puk (leg. ? 13.09.1990), r. Danube, Dolnice, ponds. (leg. V. Stevanović, 18.07.2004), Banatska Palanka, "Jaruga", (leg. V. Stevanović, 15.10.2002), r. Danube, Dolnice, ponds in Stevanova plain (leg. V. Stevanović, 18.07.2004), Kolubara by Obrenovac, old river bays (leg. D. Lakušić, ?), Special Nature Reserve "Zasavica" by Sremska Mitrovica (VESIĆ et al. 2011), Subotička peščara, Selevenska ponds, N 46° 07' 38.9" E 19° 50' 10.9", (leg. J. Blaženčić, 09.05.2011), Ciglana Stanišić (leg. Gabor Mesaroš, 23.06.2011).

**f. humilior** Mig. (as *C. fragilis*). River Sava by Jakovo in Srem (FILARSZKY 1931).

**f. lacustris** Mig. (as *C. fragilis*). River Sava by Jakovo in Srem (FILARSZKY 1931).

**f. laxa** Mig. (as *C. fragilis*). River Sava by Jakovo in Srem (FILARSZKY 1931).

**f. stricta** Mig. (as *C. fragilis*). River Sava by Jakovo in Srem (FILARSZKY 1931).

**f. normalis** Mig. (as *C. fragilis*). River Sava by Jakovo in Srem (FILARSZKY 1931).

Threat factors: Eutrophication, habitat drying, water level variation, mechanical cleaning

IUCN Threat status in Serbia: VU (D2).

#### ***Chara hispida* (L.) Hartm. 1820**

Syn.: *Chara major* Vaill. 1721; *Chara hispida* var. *major* Hartm. 1820; *Chara spinosa* Rupr 1845; *Chara major* Hy 1913; *Chara hispida* ssp. *eu-hispida* (L.) Corill. 1957; *Chara hispida* var. *hispida* f. *hispida* L. em R. D. W. 1962; *Chara hispida* var. *major* f. *major* L. em. R. D. W. 1962

Habitat: secondary, ephemeral fresh shallow waters, on clay and sandy substrate; shallow ponds with slightly alkaline waters (pH = 7.5).

Distribution in Serbia: Ždralica near Kragujevac (KATIĆ 1898/99), Makova sedmica by Subotica (leg. Georg Džukić, 09.1998), Subotička peščara, Majdan pond – road to Kelebija N 46° 09' 32.6" E 19° 36' 21.4" (leg. J. Blaženčić, 09.05.2011), Subotička peščara, Selevenska pond, N 46° 07' 38.9" E 19° 50' 10.9" (leg. J. Blaženčić, 09.05.2011)

Threat factors: habitat drying, pollution, overgrowing  
IUCN Threat status in Serbia: EN (B1, B2a, B3c).

#### ***Chara intermedia* A. Braun in Braun, Rabenh. & Stizenb. 1859**

Syn.: *Chara aculeolata* Kütz. In Reich. 1832; *Chara hispida* var. *aculeolata* Rabenh. 1853;

*Chara aculeolata* ssp. *intermedia* (A. Br.) Cirill. 1957; *Chara hispida* var. *major* f. *intermedia* (A. Braun) R. D. Wood 1962.

Habitat: ponds; limnophyte, on muddy substrate  
Distribution in Serbia:

**f. brachyphylla** A. Br. In ponds around Negotin (KOŠANIN 1907a, b; MILOVANOVIĆ 1949).

**f. decipiens** Mig. South Serbia, Tiodže by Semeteša in Kopaonik Mt, Spring of Lisinski stream (KOŠANIN 1907a, b; MILOVANOVIĆ 1949).

Threat factors: habitat drying out  
IUCN Threat status in Serbia: CR.

#### ***Chara rohlenae* Vilhelm 1912**

Syn: *Chara vulgaris* var. *gymnophylla* f. *rohlenae* (Vilh.) R. D. W. 1962

Habitat: ponds; shallow water (to 0.2 m). In montane areas.

Distribution in Serbia: pond in the locality Ponor down from Klinski peak (1600 m). (leg. P. Lazarević, 28.09.2010)

Threat factors: habitat fragility

IUCN Threat status in Serbia: CR (Ae, B).

#### ***Chara tenuispina* A. Braun 1835**

Syn.: *Chara globularis* var. *tenuispina* (A. Braun) R. D. W. 1962

Habitat: lakes, rivers; shallow (to 0.3 m), meso to eutrophic waters in plains (pH = 7.2), on slime and muddy-sandy substrate.

Distribution in Serbia: lake by Kelebija, NW from Subotica (BLAŽENČIĆ 1995), river Čik by Tisa. (leg. G. Subakov-Simić, 09.05.2013).

**f. nitida** Mig. Crepuljnik Mt (between Ivanjica and Raška) (KOŠANIN 1907a, b; MILOVANOVIĆ 1949)

Threat factors: habitat drying out, eutrophication, zootechnics

IUCN Threat status in Serbia: CR (B2a, C2b).

#### ***Chara tomentosa* L. 1753**

Syn.: *Chara latifolia* Willd. 1809; *Chara ceratophylla* Wallr. 1815; *Chara tomentosa* var. *tomentosa* L. Em R. D. W. 1962

Habitat: ephemeric ponds around streams

Distribution in Serbia: Spa Poklek (Kosovo) (as *Chara ceratophylla*) (MARINOVIĆ & KRASNIĆ 1970)

Threat factors: habitat fragility

IUCN Threat status in Serbia: CR (B2a).

#### ***Chara virgata* Kützing 1834**

Syn.: *Chara fragilis* ssp. *delicatula* Braun et Nordstedt 1882; *Chara delicatula* Ag. 1824;

*Chara globularis* var. *virgata* (Kütz.) R.D.W. 1962

Habitat: ponds by rivers, fishponds, lakes; limnophyte in ephemeral ponds, 0.2-5.0m, in fresh mesotrophic to eutrophic waters (pH=7.4-7.8), on slim and sand substrate.

Distribution in Serbia: near Crnče, in ponds by Drina river between Mali Zvornik and Ljubovija. (leg. P. Andus, 10. 1987); Veliko Nedžinatsko lake (Metohija) in Prokletije Mt (1850 m). (leg. J. & Ž. Blaženčić 12.06.1986); Fishpond, Južna lake, by Ečka (as *Chara delicatula* Ag., BLAŽENČIĆ et al. 1995a,b); Vlasinsko lake (1215 m). (as *Chara delicatula* Ag., BLAŽENČIĆ & BLAŽENČIĆ 1991; RANDJELOVIĆ & BLAŽENČIĆ 1996).

Threat factors: eutrophication, overgrowing, habitat drying out, water level variation, fish overpopulation, agrochemistry

IUCN Threat status in Serbia: EN (A2e, C2a).

### *Chara vulgaris* L. 1815

Syn.: *Chara vulgaris* L. 1753, emend Wallroth; *Chara foetida* Braun 1834; *Chara vulgaris* var. et f. *Vulgaris* R. D. W. 1965; *Chara vulgaris* f. *gymnophylla* (A. Br.) Hy 1914; *Chara vulgaris* var. et f. *gymnophylla* R. D. W. 1962

Habitat: lakes, streams, channels, fishponds, ponds, waterholes, swamps, peatlands, pools, meadow pools, inundation areas around rivers; limnophyte, in primary and secondary mesotrophic to eutrophic, mineral waters (pH = 6.4 – 8.7), on slime, detritus, sands (0.1 - 2.0 m)

Distribution in Serbia: Vranje (SIMIĆ 1895/96), ponds around Ždralice near Kragujevac. (KATIĆ 1898/99), Negotinski rit (MARINOVIC 1953, as *Chara foetida*), Belgrade surroundings (Velika Bara, Viliman, Džajine Bare, Dubovske Mlake, Bele Vode, Petrec channel, MARINOVIC 1955, as *Chara foetida*), Poklek (Kosovo, MARINOVIC & KRASNIĆ 1970, as *Chara foetida* A. Br.), Senta (GUELMINO 1973, as *Chara foetida*), Petrovaradinski rit (VUKOJE 1979; BLAŽENČIĆ et al. 1995a,b), in Mrtva Tisa by Senta (GUELMINO 1973), Belgrade, pond Dubovske Mlake (MARINOVIC 1955; BLAŽENČIĆ et al. 1995a,b), Belgrade, in channel Petrec (MARINOVIC 1955, BLAŽENČIĆ et al. 1995a,b), Veliko Blato by Belgrade (JANKOVIĆ 1953; BLAŽENČIĆ et al. 1995), Sušički stream by Kragujevac (BLAŽENČIĆ & RADOTIĆ 1982), village Vraćevšnica near Kragujevac (BLAŽENČIĆ & RADOTIĆ 1982), Drenovac, Jelina pond near Kragujevac (BLAŽENČIĆ & RADOTIĆ 1982), Kostolac (CVIJAN, 1985), Dobroselica surrounding in Zlatibor Mt, near Borova glava (leg. **var. longibractea** (Kutz.) J. Grov. Bull.-Web. Ada Ciganlija in Belgrade, Malo savsko lake - fishpond Safari, (leg. J. Blaženčić, 5.11.1996).

Threat factors: Anthropogenic influence, eutrophication, agrochemistry, ephemeral habitat, fish over-stocking

IUCN Threat status in Serbia: LR (nt).

## CONCLUSIONS

Data on charophytes from Serbia (1851-2013) are given in this study. In total, 23 species of stoneworts belonging to the genera *Nitella*, *Tolytella*, *Nitellopsis* and *Chara* were recorded in Serbia. In addition to widespread species, some characteristic for the area (e.g. *Chara canescens*) were recorded as well as endemics of the Balkans, namely *C. rohlenae*. Charophytes can be found in many types of water habitats, though they prefer clean waters. Pollution and disturbance are among the main threats for stoneworts in Serbia. Apart from a few species (*Chara vulgaris*, *C. contraria*, *C. braunii*), all the other species are threatened.

**Acknowledgements** — I wish to thank colleagues and friends who collected stoneworts in their field-research. Special thanks go to Milica Petrović-Djurić for cooperation and technical support in formation of the Collection of Charophytes of the Institute of Botany, Faculty of Biology, University of Belgrade.

## Pregled hara (Charales) i procena njihove ugroženosti u Srbiji

Jelena BLAŽENČIĆ

U radu su dati floristički i taksonomski podaci o harofitama na prostoru Srbije za period od 1851. do 2013. godine. Za svaki takson navedena je sinonimika, tip i karakteristike staništa, rasprostranjenje, faktori i kategorija ugroženosti; gde, kada i ko je objavio podatak, a za ne publikovane podatke koji se nalaze u zbirci, navedeni su legatori i vreme uzorkovanja.

**Ključne reči:** hare, Charales, Srbija, rasprostranjenje, ugroženost
